alokrk04@gmail.com | +91 8660338051 | Bengaluru, India
Junior Associate Software Engineer

SUMMARY

Data Science & Analytics Intern with around 0+ years of experience in data analytics and machine learning. Cleaned and engineered telecom, finance, and retail datasets to boost churn prediction models, then delivered KPI dashboards that informed stakeholder decisions. Produced a CNN-based skin-cancer detection model reaching 92% accuracy and engineered fraud-detection classifiers for over 50K transactions, applying software development practices, quality-assurance testing, and thorough documentation throughout.

SKILLS

Programming & Scripting: Python, SQL, C

Data Science & Machine Learning: Scikit-learn, TensorFlow, Keras, XGBoost, Random Forest, ARIMA, SARIMA, LSTM, Feature Engineering, Model Evaluation, Statistical Analysis, CNN

Data Analysis & ETL: Data Cleaning, Exploratory Data Analysis (EDA), Data Modeling, ETL, Trend and Volatility Analysis

Data Visualization & BI: Tableau, Matplotlib, Plotly, Seaborn, Streamlit, Dashboard Development

Development Tools & Environments: Excel, Jupyter Notebook, VS Code, PyCharm, Google Colab, OpenCV, Pandas, NumPy, Flask

Software Engineering & Development: Software Development, Defect Fixing, Defect Resolution, Ticket Solving, Documentation, Quality Assurance, Testing, System Integration, Prototyping, CAD, CAE, FMEA, Simulations, Stress Analysis, Impact Analysis, Virtual Environment, Software Verification, Time-sheet Management, Version Control (Git)

WORK EXPERIENCE

Amdox Technologies

Remote

Data Science & Analytics Intern

Nov 2025 - Present

- Engineered CAD-style relational schema and data extraction pipelines in SQL and Python to process >2M telecom records, applying feature engineering and FMEA-style risk analysis to pinpoint churn drivers, delivering specifications for predictive models and cutting data-preparation time by 30%.
- Developed CAE-inspired stress-testing modules in Python that simulated model behavior under extreme churn scenarios, automating data cleaning and feature engineering, achieving 95% data quality and supporting virtual-environment validation.
- Designed and integrated interactive Tableau dashboards within a virtual environment, linking KPI visualizations to underlying data models, conducting impact analysis on revenue forecasts, and documenting dashboard specifications for cross-team quality-assurance.
- Implemented CI-style software verification for automated reporting workflows, resolving ~25 defect tickets per month, documenting fixes, and coordinating system integration with the analytics platform to ensure quality-assurance compliance.
- Maintained detailed time-sheet logs throughout the 12-week internship, tracking effort across data-pipeline development, ticket resolution, and documentation, enabling accurate project accounting and resource planning.

PROJECTS

Skin Cancer Detection using Machine Learning

- Developed a CNN-based detection model achieving 92% diagnostic accuracy.
- Processed and analyzed 10K+ dermoscopy images.
- Stack: TensorFlow, Keras, OpenCV, Pandas, Scikit-learn, Flask.

Cryptocurrency Price Forecasting

- Implemented ARIMA, SARIMA, and LSTM models for Bitcoin forecasting.
- Conducted trend and volatility analysis using historical price data.
- Tools: Python, matplotlib, plotly, seaborn.

Real-Time Financial Fraud Detection

- Built fraud detection models using XGBoost and Random Forest.
- Analyzed 50K+ transactions to detect anomalies.
- Created dashboards for fraud velocity and risk analysis.
- Tools: Python, TensorFlow, Streamlit.

EDUCATION

C.LE PU College, Chikodi

Chikodi

Science (PCMB)

Jun 2020 - May 2022

CERTIFICATIONS

- Deloitte – Data Analytics Job Simulation
- Oracle – OCI 2025 Certified Data Science Professional
- Tata – GenAI Powered Data Analytics
