Dear Rockstar Games Hiring Team,

I have been a dedicated PC gamer since 2014, starting when I was ten years old. For me, gaming has always been a profound passion rather than a simple hobby, and that enthusiasm continues today. During my early years, I immersed myself in titles such as Grand Theft Auto: Vice City, San Andreas, Project I.G.I., Total Overdose, Need for Speed: Most Wanted, Counter-Strike, and Euro Truck Simulator. Although I did not own any consoles, I developed a lifelong commitment to the medium. I vividly remember copying every new game I could find onto a flash drive just to ensure I could play it on my system.

Regarding Rockstar's immersive worlds, I have played through the entire modern catalog, including GTA III, Vice City, San Andreas, GTA IV, GTA V, and Red Dead Redemption 2. I particularly enjoy the mechanics of driving in Grand Theft Auto and the realistic experience of riding horses in Red Dead Redemption. I remember the days of keeping handwritten notes of cheat codes like "SEAWAYS," "LEAVEMEALONE," and "ROCKETMAN." Whether it was spending hours exploring Los Santos or tracking wildlife in the frontier, these experiences defined my game knowledge for world-building.

I am eager to contribute my skills and dedication to the Rockstar Games team. I am currently based in Bengaluru and am fully prepared to work in-office.

Thanks for your time and consideration.

Sincerely,

Alok Kondebettu
